

Supporting the Common Core Standards with Rich Digital Media

Friday November 2, 2012

A Day of Discovery for K-12 Educators

Workshop #021-13

Featuring Matt Monjan as Keynote, has blended technology and education for more than 15 years in the worlds of both business and K-12 education. Prior to joining the **Discovery Education** team in 2004, Matt designed, developed, and implemented adult education and certification programs for two of the largest trade associations in the country. *You do not want to miss this opportunity to hear Matt's inspiring message as he addresses Consumer to Creator – The Student as Both the Learner and the Teacher.* The fact that not only does today's student want to be engaged through technology, media, and conversations at the same time, they also want to be able to instantly share their own content, ideas, and creativity with their peers and, in fact, the world. Our students have progressed beyond consumers of content to become producers and publishers. How do we, as educators, teach to someone who is technically proficient, and social media-minded? During his keynote session we'll explore different avenues in which the traditional model of learning is replaced with a challenge that requires students to draw on prior learning, acquire new knowledge, and tap their creativity to fashion solutions.

In addition, **Discovery Education's** assets provide an excellent tool kit for designing lessons based on *Common Core expectations*. During this professional development experience educators will look at the depth and breadth of Discovery Education's rich media and how it ties directly to Common Core.

Participants will...

- Experience modeled classroom instruction embedded with rich digital media resources
- Join in Common Core immersion activities
- Be prepared to return to their classroom and plan, implement, and assess lessons based on the Common Core standards.

Participants are encouraged to bring your own device for hands-on learning opportunities!
